

Pre-Assembling Machine

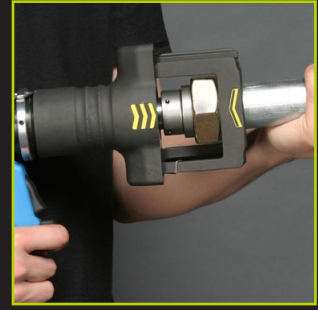

PACE1

- ⇒ Light, but extremely powerful. Designed for hydraulic and sprinkler pipes (also High Fog) installations.
- ⇒ Easy and simple to use: Socket change and pressure adjustment take just few seconds.
- ⇒ Easy to move around with the shoulder strap, that also reduces stress on arms.
- ⇒ Revolutionary technology protected by several global patents.

A CHANGE OF PACE

Pre-assembly of cutting ring

Pre-assembling Machine

Many professionals have contributed their tens of years of experience to create this innovation, which incorporates new thinking with proven technology. PACE1PRESS pre-assembling machine is designed to meet user's needs. It will make work easier, quicker and more efficient. Pre-assembly can be done on site and the tool is easy to move even to difficult locations. This way it reduces the time needed for each installation significantly, thus creating cost savings and increasing profitability.

EASE OF USE

Depending on the task at hand pressure needed can be chosen by simply twisting the 4,5 turn linear pressure adjustment .

Technical specifications:

- Battery operated
- Voltage 14,4V
- Weight 7kg
- Pipe diameter: min Ø 6mm
max Ø 42mm

Designed for DIN 2353 / ISO 8434 fittings.
Precision casting nose part made of SIS 2244 steel according to SFS-ISO 8062

Sales package includes:

- PACE1PRESS pre-assembling machine
- 14,4V 3,0Ah Ni-MH battery (2 included)
- Battery charger
- Shoulder strap
- Heavy Duty case
- Sockets as needed
- Lubricant oil spray
